Valin Corporation Announces Merger with Lang Engineering Equipment Co., Expands Portfolio of Products and Services and Strengthens Position in Aviation Market

San Jose, Calif. (December 2013)— Valin Corporation, a leading provider of process control and automation solutions to the technology, energy, life sciences, natural resources and transportation markets, announces a merger with Lang Engineering Equipment Co. in San Jose, CA. By merging with Lang Engineering Equipment Co., Valin adds an expanded selection of pumps, filters and refueling equipment to its already extensive portfolio of available products and services.

“We’re very excited to announce our merger with Lang Engineering,” said Joseph Nettemeyer, President and CEO of Valin Corporation. “We’ve enjoyed working with this company for a number of years and are looking forward to utilizing their expertise. Their extensive knowledge of pumps and filtration equipment will enable us to significantly expand our business and customer base.”

Lang Engineering, originally incorporated in 1951, focuses on small process pumps, filters, filtration systems, heat exchange systems, transfer, metering, OEM's and refueling equipment. Merging with this company will allow Valin to support clients with custom solutions in a wide variety of applications.

“The most significant aspect of this merger is that it expands Valin’s business into the aviation industry,” continued Nettemeyer. “We can now provide solutions in the form of complete turnkey fueling, pump and filtration systems, a service which was beyond our capabilities up until now.”

Valin provides complete solutions of process valves, instrumentation, filtration, heating, controls and automation products for the transportation industry. The company delivers a variety of solutions to handle the most demanding requirements, providing a consistent reliable performance. For more information about Valin’s work with the transportation industry, please visit <http://www.valin.com/industries/transportation>.
