FOR IMMEDIATE RELEASE

Valin Corporation Awards U.E. Precision Sensors as 2012 Supplier of the Year

U.E. Precision Sensors is the first recipient of the Valin Supplier of the Year Award

San Jose, Calif. (March 11, 2013)— Valin Corporation, the leading technical solutions provider for the technology, energy, life sciences, natural resources, and transportation industries, awards U.E. Precision Sensors (UE-PSI) as the 2012 Supplier of the Year. UE-PSI is the first recipient of Valin's Supplier of the Year Award, which recognizes the outstanding performance of product manufacturers for automation, fluid management, precision measurement, filtration and process heating.

"U.E. Precision Sensors has been a very effective partner for Valin," said Brian Sullivan, Sales Manager – Semiconductor, Valin Corporation. "Our account representative, Rob Reis, and his team have exceeded the proverbial 'extra mile' to assist us in our sales efforts. Their consistent availability for sales calls, Valin Mobile Technology Vehicle events, and their dedication to support our marketing efforts all prove a strong commitment to Valin."

"The quality of U.E. Precision Sensors' products is appreciated by our customers and their ability to provide quick technical drawings, assistance to our salespeople, and rush production, when needed, is invaluable," said Joe Nettemeyer, president, Valin Corporation. "Additionally, U.E. Precision Sensors looks to us for new ideas, such as the 'Voice of the Customer' initiative, and everyone from the president to their administrative staff has a positive attitude, protects our business, and truly acts as a partner with Valin."

[U.E. Precision Sensors](#), located in Milford, CT, was founded more than 50 years ago to serve the aerospace and defense industries. Acquired by United Electric in 1989, Precision Sensors designs and manufactures electromechanical and solid state pressure, vacuum, liquid level, temperature, flow and altitude/airspeed switches for commercial and military aerospace, and semiconductor process markets. Like U.E., Precision Sensors delivers fundamental value in the form of cost effective, reliable threshold detection and switching products for critical control, monitoring and alarm functions used to protect people, expensive equipment and processes.

Other special recognitions were awarded to Bosch Rexroth for their Marketing Leadership, Chromalox for their Training Leadership, Omron for their Engineering Support Leadership and Intelligent Actuator (IAI) for their Outstanding Partner Support. Awards were given out at Valin's Supplier of the Year Award ceremony held Thursday, March 7, 2013.
