Mobile Technology Vehicle

Innovative Systems Solutions

Valin Corporation is dedicated to providing innovative solutions and technical expertise to meet your process requirements. On board the Mobile Technology Vehicle you and your associates will see the latest technologies in Automation, Filtration, Fluid Handling, Fluid Power, Process Control, and Process Heating systems.

What is the Valin Mobile Technology Vehicle?

Our Mobile Technology Vehicle (MTV) is a promotional and training facility. Valin is traveling across the Western United States to share our product solutions and service capabilities with our customers. This program provides you and your associates the ability to see the latest solutions and innovative products for industrial process control and analytical applications.

The MTV is an interactive experience of displays that have been designed to give a 1,000 foot view of Valin's qualifications. Follow a guided tour to learn about all of Valin's capabilities or explore solutions at your own pace.

Valin gives its customers a competitive edge by bringing solutions directly to your facility. Many of our solutions will improve your processes by making them safer, more reliable, and faster.

Planning a Mobile Tech Tour Visit to Your Location

Please work with your local Valin Account Manager to plan the visit to ensure the event goes smoothly.

Potential Visitors

People in these roles or with these responsibilities may benefit from the MTV Tour when it visits your location:

- Engineering: Design, Plant/Facilities, R&D, Safety
- Plant Management & Maintenance
- Purchasing
- Safety Managers

Site Location Recommendations

- High visibility to employees
- Level, asphalt surface 55' x 26' minimum
- Accommodate turning radius of a 45' vehicle
- Washroom facilities nearby
- Blocked-off parking spaces to prevent vehicles from occupying the site

Mobile Tech Tour Promotion

A successful MTV Tour visit begins with an onsite coordinator who announces the visit well in advance and issues specific invitations. Valin will supply a number of tools to assist you:

- Posters for high traffic locations
- Flyers for bulletin boards or offices
- PDF versions of these documents

Mobile Technology Vehicle
