Mobile Technology Vehicle

Innovative Systems Solutions

Are you interested in providing your engineers with a way to access the latest developments in technologies for the Refinery industry, but don't want to send them off-site? Valin has developed a unique interactive experience on-board our Mobile Technology Vehicle where engineers can discover solutions that are making plants more productive, profitable, and safer.

What is the Valin Mobile Technology Vehicle?

Our Mobile Technology Vehicle travels across the Western United States sharing innovative system solutions with our customers. Your team can follow a guided tour or explore solutions at their own pace on any one of our 7 interactive touchscreens.

We work with you to create solutions that will increase productivity, achieve higher performance, and better control for your facilities.

Our engineered solutions automate and simplify your manufacturing process so you can focus on what you do best.

The MTV has hosted over 15,000 people at more than 500 sites since its launch and has had terrific reviews through the years. The engineers who participated have appreciated our ability to bring a view into "what's new and relevant" to their workplaces and many have found existing solutions they weren't aware of through the events.

“

This is an incredible system, everything in one place and really easy to use. – **Supply Chain Manager**

"It's great to see how well you understand our processes, most of our suppliers have very little understanding about what we do." – **Equipment Engineer**

”

"I want all of my people to see this!" – **Managing Director**

Planning a Mobile Tech Tour Visit

Please work with your local Valin Account Manager to plan the visit to ensure the event goes smoothly.

Valin personnel will take care of all the set-up, provide a nice lunch for the participants, and clean up before leaving.

Mobile Tech Tour Promotion

A successful MTV Tour visit begins with an onsite coordinator who announces the visit well in advance and issues specific invitations. Valin will supply you with the following:

- Electronic invitation to email to employees
- Flyers for bulletin boards or offices

Request an MTV visit [here](#).

Site Location Recommendations

- High visibility to employees
- Level, asphalt surface 55' x 26' minimum
- Accommodate turning radius of a 45' vehicle
- Washroom facilities nearby
- Blocked-off parking spaces to prevent vehicles from occupying the site

Recommended Daily Schedule

This is our recommended schedule; it can be altered to suit your requirements.

Time	Event
10:00 a.m.	Arrive onsite & setup (1 hr.)
11:00 a.m.	Open House
1:00 p.m.	Lunch
2:00 p.m.	Teardown to leave (1 hour)
