

MOUNTING SOLUTIONS

CAMERAS

LIGHTS

SENSORS

Swivellink[®] mounts are a better way to mount vision cameras, lights, and sensors. Because of the flexibility and range of the Swivellink[®] patented design, you can fine-tune to just about any position required.

We have mounting plates for the most popular brands on the market today. With vision products coming in all shapes and sizes, we designed three different series (XS, Standard, HD) that should work for most applications. As with all Swivellink[®] mounts, we provide a through hole for most wire management that provides a clean look and protection from damage.

Swivellink[®] is offered in imperial and metric. Please contact your distributor today for ordering information.

Mounts over 50+ Brands!
