Watlow’s new ASPYRE™ power controller family is flexible and scalable, and available with a variety of options allowing one platform to be re-used across a wide range of applications, which can help save time and money. ASPYRE models available include sizes from 35 to 700 amps.

This power controller family features multiple advanced microprocessor-based firing and control mode algorithms. Combined with diagnostics and several communications options the product enables equipment and factory automation.

Controller firing modes include zero cross, burst firing, single cycle, delayed triggering and phase angle. These smart algorithms enable the product to easily control a wide base of heater loads including Nichrome®, moly, silicon carbide, tungsten quartz and infrared lamps and transformer-coupled loads.

ASPYRE offers a comprehensive list of modular options that deliver space and labor savings including controlled legs (1, 2 or 3), semiconductor fusing, load current measurement, amperage size and user interface.

Features and Benefits

Heater bakeout
- Protects heater on start up
- Eliminates labor and time associated with checking for wet heaters

Integrated semiconductor fusing, current transformer and user interface
- Saves installation time and eases setup and commissioning
- Delivers a user-friendly, intuitive interface

Industry-leading design and serviceability
- Offers a robust SCR design to meet a rugged industrial environment’s high quality and reliability needs
- Provides quick and easy access to maintain and service fuses and individual legs in minimal time
- Enables fast troubleshooting by providing helpful thermal system diagnostics

Comprehensive power controller range
- Provides wide range of options from simple single-phase to complex three-phase loads to 690V

100KA short circuit current rating (SCCR)
- Enables greater protection in the event of a short circuit

c-UL® 508 Listed
- Shortens project schedules, agency testing and expenses

Control modes: contactor, voltage, current or power
- Satisfies a wide range of demanding thermal applications

Load firing modes: zero-cross, burst fire, phase angle, soft start, half-cycle, single-cycle, delayed triggering
- Handles a wide range of load types including Nichrome®, medium and long waveform infrared lamps, moly (Kanthal-Super), transformers, silicon carbide, UV lamps and tungsten
- Protects and extends the life of connected loads

Wide range of communication protocols
- Enable factory and process automation with connectivity access to process and equipment data using Modbus® RTU, Ethernet TCP, WiFi, Profibus, Profinet, USB device (configuration and data file transfers)

Open heater and shorted SCR indication
- Minimizes production downtime with easy to understand, intelligent, troubleshooting diagnostics

Integrated USB and user interface for configuration
- Easily and safely program configuration settings as the user interface can be powered through USB connection
- Eliminates a user from having to work in a high voltage hazard environment. High voltage to controller or system panel can be turned off while setting controller configuration

Typical Applications
- Furnace and ovens
- Autoclaves
- Kilns
- Heat treatment
- Glass industry
- Semiconductor
- Power generation
- Oil and gas
- HVAC
- Textiles
- Plastics
- Packaging
- Petrochemical
- Dryers and curing
Specifications

**Power Bases**
- Single-phase, 1 controlled leg (2 SCRs)
- Three-phase, 2 controlled legs (4 SCRs)
- Three-phase, 3 controlled legs (6 SCRs)

**Load Amp Range**
- 35A to 700A @ 40°C ambient
- Amperage derating curve for other ambient temperatures

**SCR and Amperage Rating**
- Latching current 1A min.
- Power dissipation: approximate 1.25 to 1.5 watts per amp per controlled leg
- Leakage current: 15mA
- SCCR rating 100,000A up to 600VAC

**Line and Load Voltage Range**
- 24 to 480V
- 24 to 600V
- 24 to 690V
  - Voltages +/- 10% min./max.
  - 690VAC only available on units ≥300A
- Isolation voltage 2500V

**Voltage frequency**
- 50 to 60Hz
- Automatically compensates for 47 to 70Hz

**Controller Operating Supply Voltage**

<table>

</tr>
</tbody>
</table>

**Control Modes and Load Types**
- Voltage, voltage squared, current, current squared, power, open loop and external
- All control modes available with any firing type combination
- Normal resistive loads - Nichrome®, infrared lamps; medium and long waveform
- Others – Moly (Kanthal-Super), transformers, silicon carbide, UV lamps, tungsten

**Output Control Firing Types**
- Zero crossing
- Single cycle
- Burst firing with delayed triggering, safety ramp and peak current limit options
- Burst firing with soft start option (phase angle soft start switching over to burst firing)
- Phase angle with soft start option
- Half cycle with start ramp and peak current limit options

</table>

**Digital Inputs 1 and 2**
- ON >= 4VDC, OFF <= 1VDC
- 4-30VDC @ 5mA max.
- Digital input functions: enable, change to V feedback, local/remote set point enable, change firing between phase angle and default firing mode, ref 1/2 selection, log enable, bakeout enable feedback transfer from V to main
- A switched VDC control output can be connected to the digital input as an open loop control mode command signal

**Analog Inputs 1 and 2**
- Voltage
  - 0-10VDC
  - 15Ω impedance
- Current
  - 4-20mA
  - 100Ω impedance
- Potentiometer
  - 10KΩ min.

**Analog Output 1**
- 4 to 20mA into 500Ω max. load with 50μA nominal resolution
Analog Output Functions
- Retransmit: Load voltage, current, power or measured input

Electromechanical Relay Output
- Form C, 30VDC max. at 1A resistive load or 0.5A at 125VAC, 6000 cycles at 30VDC, 100,000 cycles at 120VAC

Relay Functions
- Alarm output options for heater open break, SCR short or current limit, heat sink/ambient over-temperature

DC Power Supply for Digital Inputs and Potentiometer remote set point input
- 10VDC @ 10mA max.

Fusing
- Integrated semiconductor fuse
- Refer to amperage chart for I²T fuse values

Diagnostics Annunciation Messages
- Heater break (open), SCR short circuit (closed), current limit, thermal switch, SD card error, comms watchdog error, bakeout in process, aux. voltage too low or high, voltage line loss

Operator Interface
- 0.96 in. white OLED display with 128 x 64 pixel resolution
- L/R, F UP and DOWN arrow keys)
- 4 discrete LED indicators for local/remote mode, enable, communications and alarm

Connectivity
- EIA 485, Modbus® RTU
- Modbus® TCP Ethernet
- WiFi
- USB 2.0 device connection
- PROFIBUS DP
- PROFINET

Configuration
- PC software tool and RS485, USB port, or on-board keypad and LED display

Integrated Data Logging
- Storage: 16 GB SD memory card
- .CSV file type
- User programmable logging intervals 1 to 255 seconds
- Up to 10 parameters selectable by user: line frequency, output voltage (RMS), output current (RMS), output power (Average), status, commands, set point, current limit set point (RMS), load resistance, input voltage (RMS)

Real Time Clock and Battery Back-up
- Typical battery life: 5 years at 77°F (25°C)
- CR2032 field replaceable battery

Cooling mode
- Forced air (fan)
- 120 or 240VAC, 17 watts per fan used

Control Terminals
- Terminals are touch safe, removable, 12 to 22 AWG

Line and Load Terminals
- Compatible with crimp lug terminals or busbar
- Refer to user manual for wire size, compression and torque requirements

Mounting
- Panel mounting with screws
- Must be mounted with heat sink fins in vertical orientation

Environment
- 0 to 40°C without derating.
- 5 to 90% RH (relative humidity), non-condensing
- Over 1000 meters of altitude reduce the nominal current by 2% for each 100 meters
- Storage temperature -25 to 70°C max.

Agency Approval and Regulatory
- cULus 508 Listed File E73741
- cUL® Listed to C22.2 No. 14
- CE EMC Directive 2014-30-EU, EN 60947-4-3 Class A Emissions
- CE Safety Directive 2014-35-EU, EN 60947-4-1, -4-3
- RoHS 2011-65-EU
- W.E.E.E 2012-19-EU
- 690 VAC units not covered by UL®
- 35 to 40 amp models submitted to UL® for testing and approval

Accessories
- 6 ft USB 2.0 to micro USB device cable 0219-0480-0000
- Fuses - see table below.

## Ordering Information

**Base model includes:**
- Two power loops: loop one for open loop, voltage, current or power control, *loop two for maximum current control,
- Two analog inputs (0-10VDC, 4-20mA selectable), two digital inputs, **analog retransmit, semiconductor fusing and current transformers for each leg, mechanical relay heater break alarm, RS-485 Modbus* communications, LED user interface and keypad, 10VDC auxiliary power supply

* Loop two maximum current limit available in 1-phase models only.

**Analog retransmit is not available on 35-40A 3-phase models. Analog retransmit and analog input two are both included on 35-40 single-phase models but only one option can be active, user selectable.
