Testimonial

"When we needed to upgrade our Omron controller, Valin saved the day. We had the hardware ready to go, but had not upgraded our software yet, which put us in a bind. One of the Valin senior application engineers came to our site right away and got us up and running with a 30-day version of the software. He helped us all day and even stayed after hours to make sure my laptop was working properly. Valin has an excellent team, and I highly recommend them to other companies."
