

One-Stop Solutions Provider For Air Preparation

**High-quality, reliable air preparation solution
to maximize system performance**

Air Prep Solutions to Improve Your Operational Excellence

A One-Stop Solutions Provider.

Our technologies include aluminum and stainless steel filter regulators and sophisticated filtration systems — all from a single supplier.

**REDUCE
SUPPLY CHAIN
COMPLEXITY**

Your Reliable Project Partner.

Collaborate with experienced partners to solve your toughest challenges, all while enjoying ease of sourcing and technical support.

**ENGINEERING
SUPPORT
YOU CAN RELY ON**

High-Quality Products.

Leveraging our proven expertise in fluid control, our comprehensive range of air preparation products will improve your uptime in process applications.

**MAXIMIZE
PROCESS SAFETY
AND RELIABILITY**

VALIN®

EMERSON™

Reliable, Robust and Effective Air Prep Systems

Our comprehensive filter regulator lineup includes the ASCO™ Series 342A Stainless Steel Filter Regulator, Series 641/642/643 Aluminum Filter Regulator and Tri Stage Filtration System. Our high-flow Series 342A provides precise pressure regulation to actuators, ensuring only clean, dry media reaches your downstream devices. Our Series 641/642/643 comes with a wide range of options, including low-temperature operation, manual and automatic draining and low-copper content to prevent fluid or gas contamination. And, our Tri Stage system effectively removes all sub-micron particles, moisture and oil aerosol from instrument air, improving your equipment durability in critical applications.

Product Selection

ASCO™ Series 342A Stainless Steel Filter Regulator

- Full stainless steel construction to stand up to the most corrosive, harsh environments
- Compliant with NACE MR 0175 requirements for sour gas applications
- Standard and Autodrain feature available for effective moisture removal
- 1/4 to 1-inch NPT with compact versions available
- Quick Relief feature prevents trapped pressure from locking the actuator in position if supply air pressure is lost

ASCO™ Series 641/642/643 Aluminum Filter Regulator

- Robust aluminum design with powder coating for enhanced salt spray resistance
- 1/4 to 1-inch NPT & G sizing available, delivering best in class flow capability
- 641 (standard) 642 (high flow) and 643 (large size) models
- Standard and Autodrain feature available for effective moisture removal
- Quick Relief feature prevents pressure buildup if supply air pressure lost
- Ex H non-electrical: ATEX, CRN and UKCA certifications

ASCO™ Tri Stage Filtration System

- For compressed air and neutral gas
- Fully stainless steel exterior (NACE MR 0175)
- First-stage: 25- μ m particulate filter; second stage: 5- μ m particulate filter; and third stage: 0.01- μ m coalescing filter
- Features include maintenance bypass, visual lifespan and moisture indicators and a fully automatic drain option
