### Cautions during Use

- Follow instructions in 'Cautions during Use'. Otherwise, It may cause unexpected accidents.
- Use the product, 0.5 sec after supplying power. When using separate power supply for the sensor and load, supply power to sensor first.
- The power supply should be insulated and limited voltage/current or Class 2, SELV power supply device.
- Wire as short as possible and keep away from high voltage lines or power lines, to prevent inductive noise.
- When using sensor with the equipment which generates noise (switching regulator, inverter, servo motor, etc.), ground F.G. terminal of the equipment.
- This unit may be used in the following environments.
  - Indoors (in the environment condition rated in 'Specifications')
  - Altitude max. 2,000m
  - Pollution degree 2
  - Installation category II

### Sold Separately

- Connector: CT-01 (connector type), CT-02 (cable type, length: 1 m)

### Cautions for Installation

- Tighten the screw with tightening torque under 0.49 N m.
- In case of F and R type, as shown below, make sure that the bottom of the product and the mounting surface are in direct contact with each other.

### Connections

#### ■ Cable type

#### ■ Connector type

- For LOAD connection, follow the cable type connection.
- Be sure to connect the unit using the dedicated connector (CT-01 or CT-02, sold separately).
- If it is soldered on the unit terminal pin directly not using the connector (CT-01), it may cause product damage.

Pin	Color	Function
①	Brown	+V
②	White	Control
③	Black	Output
④	Blue	0V

#### ■ Selectable operation mode

- ⚠ Be sure to connect the control wire when selecting the operation mode. Failure to this instruction may result in product damage.

Operation mode	Connection
Light ON	(White) Control wire connects with (Brown) +V
Dark ON	(White) Control wire connects with (Blue) 0V

### Circuit

#### ■ NPN open collector output

#### ■ PNP open collector output

- SCP (over current protection), SCP (short circuit protection)
- If short-circuit the control output terminal or supply current over the rated specification, normal control signal is not output due to the protection circuit.
